This application is in condition for allowance except for the following formal matters:

On page 14, line 4, there should be a space between "wall" and "102."

The Examiner would like to clarify the meaning of language found in the independent claims. In the last three lines of claim 1 the leading edges of the plates are defined as being of a greater depth than those located downstream. The specification on page 13, lines 12-18 define the leading edge in terms of thickness. Consistency in describing this feature is required. The Examiner is of the opinion that thickness is more accurate as depth is more closely associated with height. The other remaining independent claims 2, 10 and 11 have the same language in terms of depth instead of the described thickness of the specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Claims 1-25 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
